## Press

# intouch

INTO InTouch Magazine

"superb example of home produced software" ... "a very well designed series of games and activities to help children explore their own country."  
March 2008, Robbie O'Leary.

### Children's Technology Review Editor's Choice Award

"a straightforward and effective way to practice geography" ...  
"If you are looking for clean, affordable geography practice, this is a good choice."  
September 2008.

★★★★☆ or 4.5

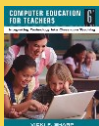

## anseo.net

"'Know Your Ireland' is in my opinion the definitive solution for any teacher teaching Geography classes. There is nothing else out there that looks better, works better or teaches better." March 2009, Simon Lewis.

"I would echo these sentiments in all three other products. Another worthy 'Top of the Class' award." May 2009, Simon Lewis.

### Integrating Technology into Classroom Teaching

Our software features in the 6th Edition of Computer Education for Teachers: Integrating Technology into Classroom Teaching.

"It is a terrific program! I wish I had it when I was growing up."  
Vicki Sharp Ph.D., author of Computer Education for Teachers.

## PARADE

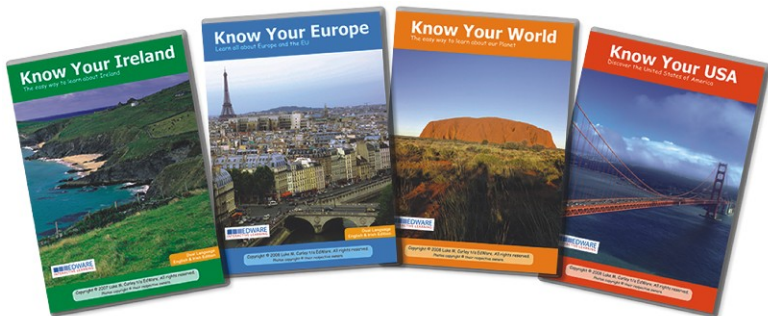

As featured in their **Back to School technology special**.

"helps kids learn geography through games, tutorials, timed quizzes and even a virtual jigsaw puzzle."

### The E-Report, The Wall Street Journal Podcast

"A very neat tool... teaches kids about US cities, states and geography." September 2008, Tom Dziubek and Paul Herrmann.

EdWare is proud to introduce our award winning geography software series: **Know Your Ireland**, **Know Your Europe**, **Know Your World** and **Know Your USA**.

Our geography software is used by over 100,000 students in more than 600 primary schools across Ireland. Each title is great for individual or collaborative student use on a laptop or desktop, and works great with a digital projector or interactive whiteboard.

### Interactive Whiteboards

Our software works great with all interactive whiteboards, an excellent way to utilise this fantastic classroom technology. Know Your Europe and Know Your USA also feature detailed full screen maps of each country and state; perfect for the big screen.

### Multiple Learning Levels

Our software utilises three styles and levels of learning, which enables the user to learn at their own pace.

- **Study Section** - a valuable reference tool.
- **Quiz Section** - offers a guided approach to learning.
- **Examine Section** - is a test of all the topics covered.

### Printable Worksheets

Each of our software titles includes a complete set of printable worksheets. These high quality PDF worksheets are perfect for combining computer based learning with traditional classroom teaching. They are great for printing and photocopying for classroom or homework.

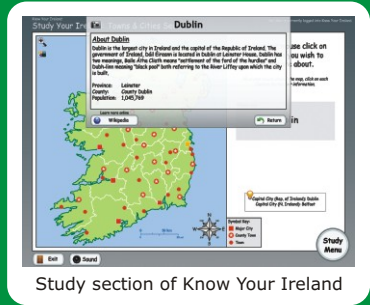

**Many More Features** are included throughout our software, including user tracking and progress monitoring, audio narration of each feature, detailed maps, hundreds of photographs, quick facts on each feature, printable certificates, spelling drawers, game timers, scoreboards, QuickFire quizzes, custom quizzes, advance teacher control panel, Google Earth, Wikipedia links, and much more.

# Know Your Ireland

Dual Language  
Includes  
English &  
Gaeilge

Know Your Ireland is a highly interactive CD-Rom designed to help students of all ages expand their knowledge of Ireland. Know Your Ireland presents the user with detailed maps of Ireland which they interact with to complete quizzes and games. Developed in Ireland in consultation with Irish teachers it is ideal for anyone who wishes to expand their knowledge of Irish geography.

All geographic features of Ireland are covered in detail: provinces, counties, county towns, major towns & cities, rivers, mountains, lakes, islands, bays and much more. The learning process is enhanced with over 50 scenic photos, NASA satellite imagery, Google Earth and Wikipedia links; all to help students better understand the geography of Ireland. Know Your Ireland is perfect software to learn all about the island of Ireland and is ideal for home and school use.

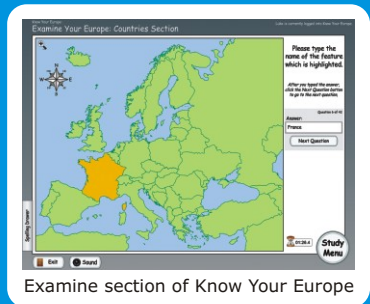

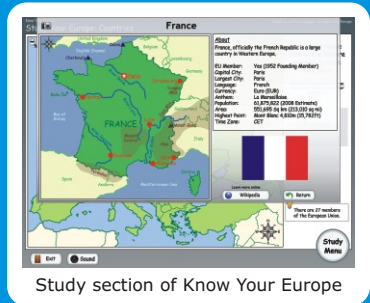

# Know Your Europe

Dual Language  
Includes  
English &  
Gaeilge

Know Your Europe introduces students to European Geography through detailed maps and quizzes. Know Your Europe is great software for anyone who wishes to learn about Europe and the European Union. Detailed interactive maps of Europe help the user engage with quizzes and games to learn all about Europe. All the countries of the recently expanded EU and Euro currency are included.

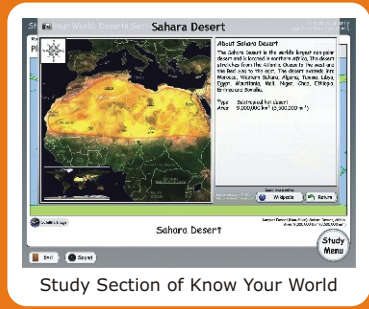

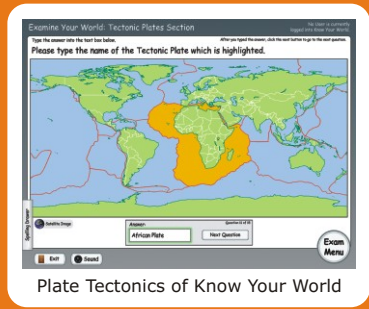

Topics covered in detail include: regions, countries, cities, mountains, rivers, lakes, islands, oceanography and much more. Also included is our fantastic puzzle of all the countries of Europe, ideal for helping users to learn the location and size of each country. The learning process is enhanced with over 100 scenic photos, printable maps, NASA satellite imagery, Google Earth and Wikipedia links. These novel features are essential in order to help students understand the geography of Europe.

# Know Your World

**Know Your World** is our fantastic geography title that introduces users to a whole new unique level of knowledge as they learn about our planet. Know Your World is perfect for anyone who wishes to learn more about the world we live in. Detailed maps of our planet using the latest NASA satellite images help the user interact with the World and complete quizzes and games while learning.

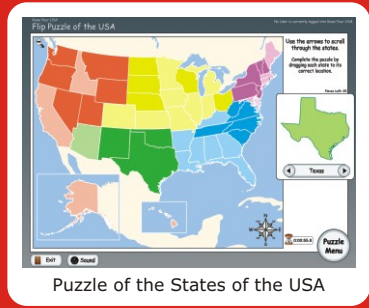

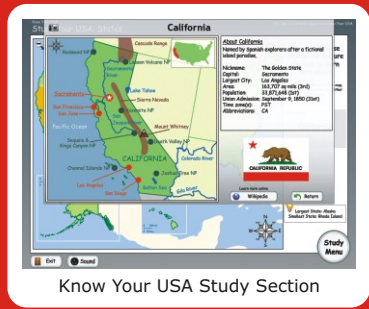

All major world geographic features are covered in detail. Topics include: continents, tectonic plates, major cities, oceans & seas, deserts, rivers, mountains, lakes, volcanoes and much more. The learning process is enhanced with many scenic photos, fantastic NASA satellite imagery, Google Earth and Wikipedia links. These all add to the users learning experience and better understanding of World geography.

# Know Your USA

**Know Your USA** is our international awarding winning educational software for learning all about the United States of America. Know Your USA is ideal for individual or classroom use and great for school projects; it is perfect for improving students knowledge of the United States.

All major geographic features of the United States are featured: regions, all fifty states and each of their state capitals, major cities, rivers, mountains, lakes, national parks and more. Learning is supported by over 70 scenic photos, printable state maps, state flags and audio narration. Our software makes learning about the USA fun and easy for anyone and great for school use.
